# FROM THE PRESIDENT

Thank you to all who attended our Holiday Party. What a success this event was and such a great turnout from our members. Additional thanks certainly go out to Michael Weisman for organizing such a wonderful event.

It is very exciting to get this group together in such a great space like the Engineer's Club and have a dinner together. Some great conversations certainly ensue.

Another very exciting note should be recognized on the Membership page of this newsletter. Robert Perkins has reached a milestone of 70 years as a Dayton ASHRAE Chapter member. In addition, Harold Taylor and Dick Durbin have achieved very similar milestones with all three over 60 years as local, dues paying members. What an accomplishment! Thanks so much to all three for their commitment to the Dayton area.

Our next meeting will be a lunch meeting on February 11th at the Engineer's Club. We hope to see you there!

*Bryan W. Schenck* — President Dayton ASHRAE

**Our goal is set for this year in  
Total Research Dollars of:**

**\$18,960**

**To-date we raised**

**\$6,000 (33% of Goal)**

The HVAC Industry gives us all our livelihood. ASHRAE's research and educational programs are what keeps our industry and professions on the leading edge and assures its continued existence.

Confident that you will recognize the benefits of this investment, we are asking you to help fund future HVAC&R research and development by donating this year.

Thanks so much for your help in advance!

## WASHINGTON INTERNSHIPS FOR STUDENTS OF ENGINEERING (WISE)

**Deadline for applications is February 8th**

Founded in 1980 through the collaborative efforts of several professional engineering societies, the Washington Internship for Students of Engineering (WISE), has become one of the premier Washington internship programs. Its goal is to groom future leaders of the engineering profession who are aware of and can contribute to the important intersections of technology and public policy.

Each summer, ASHRAE's Government Affairs Office hosts an outstanding engineering student or recent graduate to spend ten weeks in Washington, D.C. as part of this program. During the internship, the selected student will join 12-15 of their peers (sponsored by other organizations) to learn how government officials make decisions on complex technological issues and how engineers can contribute to legislative and regulatory public policy decisions. The students then write an in-depth research paper on a relevant technology issue and assess potential policy responses.

You can read the 2018 WISE interns' research papers in the WISE Journal of Engineering and Public Policy found [here](#).

ASHRAE has been a sponsor of the WISE program for three decades. ASHRAE President Sheila J. Hayter is a past participant of the program! Click [here](#) to learn more.
